

Kindergarten IXL Summer Work

Dear Parents,

Over the summer, students are being asked to continue using IXL as a tool for reviewing math. IXL is a learning program we will use throughout Kindergarten to help us learn math skills. It is a wonderful tool, and definitely is very beneficial for learning during the summer months!

While the students are welcome to practice skills of their choosing, here are some skills I have identified as beneficial in staying up to date on their skills for Kindergarten.

Preschool Level:

- A.1-A.3: Shapes
- C.1-C.8: Count to 5
- D.1-D.8: Count to 10
- E.1-E.3: Count to 20
- F.1-F.7: Comparing
- G.1-G.3, G.6-G.7: Positions
- H.1-H.6: Classify
- I.1-I.6: Size

I hope you'll encourage your son or daughter to use IXL daily! It is so easy to get back into the swing of things in August if they keep it up over the summer!
